About

Front-end developer with 4+ years of experience in website and application development. I use various technologies and frameworks, such as: jQuery, React, Next.js. [There is a portfolio on GitHub.](#)

Experience

Punkt B

Front-end developer | 2 years

Developed a system for diagnostics and a personal account for tracking clients' results.

Tasks

- Development of a personal account and admin panel for the site;
- Development of interfaces for entering, collecting and displaying diagnostic test results with filtering and search support;
- Development of a mobile version, API integration with an external database;
- Team work: designer, product manager and back-end developer;
- Bug fixing, Code Review.

Result

The time spent working with the client was reduced by 30%, as well as the time for conducting and processing diagnostics by 2 times due to the development of the interface.
